

Your satisfaction is our motivation!

Numerous successful projects of various sizes have made us specialists in mobile and stationary energy storage.

Our many years of experience in the design, production and assembly, as well as extensive knowledge of the relevant statutory provisions, made us a strong partner for you and your tailor-made energy storage.

Our strong and long-term cooperation partners allow us to better respond to your needs.

Mobile **Power**
for each purpose

Our **Products** deliver power
wherever you want

Cutting-edge **Technology**

Rely on smart-battery-solutions!

You are a manufacturer of mobile electronic devices or stationary energy storage and looking for a powerful and reliable partner?

We offer all! Mobile energy storage, battery systems, electronic development, and individual system solutions from design to test acceptance, as well as the matching charger.

Our competence:

- Development and production of batteries
- Know-how and many years of experience in manufacturing, construction and design
- Testing, maintenance, failure analysis and revision of own products and foreign manufactured products
- Punctuality, precision, flexibility, reliability and high quality
- Competent service and efficient partners

Single piece, small-batch, mass production?

SBS provides the proper energy storage - precise, individually and on time.

Mobile electrical appliances have to be above all else: Reliable!

SBS manufactures customized ROHs and REACH compliant energy storage in high quality for

- E-Mobility
- Sea
- Medical
- Industrial
- Robotics
- Power Tools
- Garden Tools
- Appliances
- UPS Systems
- Renewable Energy
- Leisure Time

The basis for robust, high quality and cost-optimized products is already in the development!

SBS develops reliable battery management systems including implementation of safety-related functions and implementation of complex state of charge investigations and communication interfaces (CAN, LIN, etc.).

You are looking for an individual, robust, production-optimized housing?

SBS works with rapid-prototyping, that after a short time, you get your close-to-production product samples.

Durable energy storage with a convincing life and performance!

The most important is a high-quality power-source!

We rely on advanced lithium-ion cells, such as manganese, cobalt and iron phosphate.

We are also happy to be your competent partner in the range of other cell types, such as nickel-metal hydride or nickel-cadmium cells.

Our independence of certain cell producers, sizes and cell technologies allows us to select the cells for your project carefully and connect them perfectly.

State of the art machinery and the constant control over all phases of development ensure a consistently high quality.

You need a test approval for your products? No problem!

We would be pleased to organize all tests with certified external laboratories, so your products will meet the requirements according to UN 38.3, IEC 62133 or other specifications.
